## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi et al. (USPN 5,936,455).

With respect to claims 4-19, Kobayashi et al. disclose, in Fig. 9, a circuit comprising: “a reference voltage generation circuit which generates a reference voltage (voltage at that gate 803); “an output circuit (806 and 810) which generates an output voltage (Vm<sub>id</sub>); “a differential amplifier (802-805) which generates a control signal (at the drain of 801) based on the reference voltage and the output voltage”; “a first noise control circuit (811)”; and “a second noise control circuit (812)”, all connected and operating similarly as recited by Applicant.

With respect to claims 1-3, clearly the above circuit to Kobayashi et al. will provide the recited method.
